A SUGGESTED CHECKLIST TO CLOSE UP YOUR UNIT PRIOR TO VACATING FOR AN EXTENDED PERIOD OF TIME

While every attempt has been made to make the following information helpful, relative and accurate, responsibility and risk for the use of this data rests with you, the homeowner. The information provided below is a suggestion only. If you have additional suggestions, please let us know when we will add to the list.

Item		Leaving	Return
No.			
1.	Remove all perishable goods from refrigerator.		
2.	Turn off icemaker		
3.	Move Patio Furniture Indoors. Bring in anything located outdoors that may blow around in a heavy wind storm.		
4.	Lock Patio Doors.		
5.	Properly dispose of any bags of garbage. Spray waste baskets and garbage cans with Lysol or other disinfectant spray.		
6.	Dispose of items that have accumulated over the winter. Recycle those newspapers, bottles and aluminum cans.		
7.	Stop mail or have it forwarded. Cancel newspapers subscriptions. Ask neighbors to remove any newspapers, periodicals, etc., being placed in your entryway or front porch while you are away.		
8.	Remove the vacuum cleaner bag and replace with a fresh one. Replace any water filters with clean ones.		
9.	Clean outdoor grill.		
10.	Notify Sunstate Management Company at (941) 870-3375 letting them know when you are leaving and returning, and who will be watching your unit while you are away.		
11.	Turn off the water and main shutoff.		
12.	Once water is turned off, turn off hot water tank either at the tank or at the electrical panel.		
13.	Inspect or have inspected your roof for damage or leaks.		
14.	Make sure your air conditioner is working properly and in good condition. Install a new air filter or clean your permanent filter. Perhaps install a digital thermostat to monitor the unit the temperature/humidity in your unit. We want to do whatever we can to avoid mold.		
15.	Have your air conditioner condensation line blown out or flushed out by a		

professional. Algae and other debris can accumulate in this line, causing major water damage to the unit. The condensation line can be cleared by any plumber and should be done periodically if your air conditioner is used a lot, but at least once per year. You should also check regularly to make sure that the condensation drain line is open. The drain is located near the foundation line of the building and can easily become clogged with dirt. 16. If you have a humidistat (highly recommended by A/C contractors), set it at 60 percent. 17. Some residents like to have a professional pest-control firm spray around the house before they leave. Others distribute the pesticide around the house themselves. 18. You may want to shut off the gas main, but relighting the furnace and hot water tank may require help from the utility company. 19. Make sure the stove is off. 20. Make sure any food items that could rot or draw bugs are thrown away. 21. Clean your dishwasher thoroughly, paying attention to the edges of the door. Blot up any residual water in the bottom after you run your last load. 22. Consider what to do regarding your phone. Some phone companies offer vacation service, which has the effect of disconnecting the phone but keeping the number active so it can be reinstated when you return. However, if you have a security system that automatically telephones the monitoring office when a break in is detected, placing your phone on vacation mode disables that part of your system. 23. Throughly clean all appliances. Don't forget the toaster, blender, mixer, microwave oven, toaster oven, and range (including over and broiler, as well as burners and drip pans). Any food particles or residue can attract pests. 24. If you have candles and plan to leave your refrigerator on, place the candles in the fridge so they don't soften during the summer. 25. Cover all sinks, toilet bowls, toilet tanks, and floor drains with plastic (Seran) wrap. This prevents water evaporating from the trap, allowing sewer gases into your			1

off.		have a "Vacation" setting that you can use instead of turning it all the way	
29. Turn off water valves to washing machine, dishwasher, sinks and toilets.			
	29.	Turn off water valves to washing machine, dishwasher, sinks and toilets.	
		<u> </u>	

30.	Turn off breakers for all circuits not needing power.		
31.	If leaving a car behind prepare it for long term storage.		
32.	Make sure the washing machine is fully drained so mold will not grow.		
33.	Make sure all curtains and blinds are closed to prevent anyone from seeing		
	inside, and to keep out as much sun and heat as possible.		
34.	Unplug TV's, any small kitchen appliances, stereo, DVD player, computer,		
	power strips, or anything that has a "Sleep" mode.		
35.	Put a timer on at least one light, set to come on and off to make the home		
	appear occupied. Ask neighbors to check the bulb and replace if it burns out. Remember to leave the breaker for that outlet turned on.		
36.	Make sure all windows are closed and locked.		
37.	Pull furniture away from the walls and pull out loose cushions on couches		
5/.	and chairs. This allows air circulation that will retard mold and mildew.		
38.	Open all closet doors and dresser drawers so air circulates. Leave no		
	clothes on wire hangers and none in garment bags, unless you leave them		
	unzipped. Rust stains and mildew are often permanent.		
39.	Some people recommend leaving ceiling fans on at the lowest setting, to		
	promote air circulation.		
40.	Place ant traps near piping or where pipe holes exist in the flooring or wall.		
41.	Some people like to set out containers around the interior of the house		
	with activated charcoal to absorb odors and moisture. It has also been		
	recommended that cat litter in containers around the house will control		
	moisture and odors.		
42.	Check or have someone check your plumbing system for leaks. Look for		
43.	wet areas or water stains in your kitchen, bathroom and laundry areas. Clean all flooring coverings and all surfaces to ensure that no food particles		
73.	or stains attract bugs or cause mildew.		
44.	Remove batteries from remote controls, clocks, etc. Leave batteries next		
	to the items from which they were removed. Upon your return, inspect the		
	batteries for leaks before reinstalling them.		
45.	Cover furniture with dust covers.		
46.	Turn on security system.		
47.	Bring a list of important phone numbers local to your winter home, such as		
	the management company, utility companies, and neighbor's phone		
	numbers.	1
